

Thread Rolling Dies Type HILGELAND

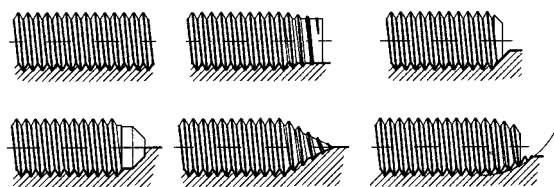

HILGELAND – Thread Rolling Dies

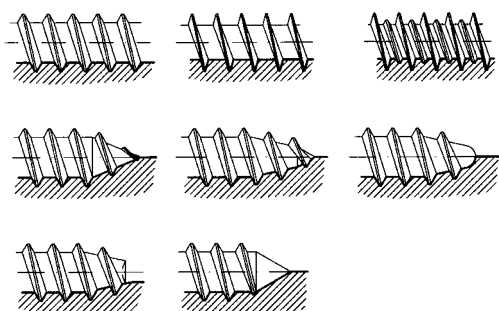

Hilgeland
Kieserling
MRP
Nutap

We manufacture a wide variety of thread rolling dies to roll threads and profiles on round formed parts. Many dies (in the size of TR, GW, WFF) are available ex stock. In addition, we produce tools depending on customer drawing or we design together optimized thread rolling dies for your specific needs for:

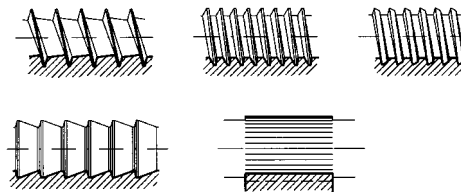

Metric thread, UN, BS or similar thread forms with round or tri-lobe thread profile.

Sheet metal; wood- and plastic screws with and without point forming

Screws with symmetrical or asymmetrical pitch for special applications, like weld-screws, dowel type U metallic drive screws, furniture bolts and knurling- and nail profile dies.

These tools are manufactured on special dedicated machine tools in our plant in Wuppertal. Software, designed in house, places us in a position to react fast and cost-effective to customer requests.

Extensive quality control during the manufacturing process and final inspection before shipment guarantee steady quality and shortest set-up times.

Together with our customers we design and optimize their products and tools to meet the differing and increased requirements.
